

# LECTRO

Blockchain-Based Technology Services for the Energy  
Industry **Lectro Project Summary**

## **What is Lectro?**

- Lectro is a revolutionary energy technology services group utilizing blockchain to improve how electricity providers and consumers conduct business.
- The Lectro project is a major step forward toward creating the modern power grid that's smarter, safer and more efficient than ever before.
- Lectro is based in Houston, Texas, USA – the Energy Capital of the World.
- The project is global – Lectro has the potential to impact people all around the world in a positive and meaningful way.

## **Purpose**

Lectro's purpose is to address very important problems in today's worldwide energy industry:

- 1) The dramatic increase in worldwide electricity usage in the next few decades and the shift in sources and providers that can meet this demand
- 2) The limited freedom of choice for consumers today regarding prices they pay and providers they use
- 3) The need for much more efficiency in traditional transactional systems of energy providers

## **Lectro Solutions and Benefits**

- Specialized blockchain-based consumer and commercial applications to dramatically increase efficiency of today's transactional systems
- Development of microgrids and other electricity-producing projects to address the global net capacity additions of electricity generation between now and 2050 that will be 80% renewable sources
- Dual integration of blockchain-based applications along with electricity-producing projects to improve today's methods of buying and selling power
- Provide communities with decentralized control and more freedom of choice
- Potential for power to be provided to people who have never experienced the benefits of electricity
- Efficient method for renewable energy producers to transact with traditional electric companies

- Lectro is the project where new meets traditional to fundamentally change the way we buy, sell, use and create electricity.

## **Lectro Token**

The Lectro utility token sale ECO Exchange Coin Offering will be hosted on TBA

- Tokens for sale: 315,000,000 • Accepted payment method: ETH BTC
- Exchange rate: 1 ETH = TBA Lectro tokens • Presale bonus: +20%

## **Use of Funds**

- 58% Platform, product and technology development
- 14% Network and microgrid development
- 17% Operations and organizational
- 11% Mobile and desktop development for trading applications
